

New England Tool designs and manufactures high quality carbide and HSS/cobalt cutting tools. By using sophisticated CNC grinding equipment we're able to produce tooling in any quantity, from a single item to large volume runs.

Superior customer service is our driving force, with an on-time delivery performance that's among the industry's best. We provide same-day shipping for standard tools from stock, and modified standards within two days. We'll even ship special tools built to customer specifications within two weeks.

As part of our goal to meet or exceed customer expectations, New England Tool is ISO 9001 Certified. It's your guarantee that every tool we produce meets the highest standards of precision and repeatable performance, tool-to-tool and lot-to-lot.

You can depend on us to build cutting tools for the most important application: yours.
